REVENUE PROGRAMS

PROFESSIONAL SUMMARY

Technical program and portfolio leader who turns ambiguous executive objectives into executable Product and Engineering systems. Leads programs across Kaseya's Cyber Resilience and Backup SaaS portfolio, spanning consolidation onto a native object-storage data plane, public-cloud migration, platform unification, and enterprise AI adoption. Builds the structure that is missing when strategy outruns execution: ownership, dependency visibility, roadmap standards, governance cadence, and executive reporting tied to live delivery data. Builds hands-on with AI in TypeScript, and brings an organizational change and behavioral health background that plans for adoption from day one.

CORE COMPETENCIES

- Portfolio & Program Leadership
- Cloud Transformation
- Revenue Retention Programs
- Product Consolidation & Migration
- AI Adoption & Governance
- Launch Readiness
- Dependency & Risk Architecture
- Executive ROI & Decision Support
- Organizational Change

PROFESSIONAL EXPERIENCE

Staff Technical Program Manager, Product & Engineering

Aug 2025 – Present

Kaseya · Miami, FL · Formerly Associate Director, Technical Program Management

FLAGSHIP PROGRAM: BACKUP PORTFOLIO CONSOLIDATION AND OBJECT-STORAGE MIGRATION

- **Leading the consolidation and migration of Kaseya's multi-product Backup portfolio** onto a natively built object-storage data plane, reducing product fragmentation and creating the shared foundation for lower infrastructure cost, public-cloud deployment, FedRAMP and regulated-market readiness, and unified Cyber Resilience workloads.
- **Built the operating mechanics connecting executive strategy to delivery:** migration workstreams, Jira-aligned roadmaps with epic hygiene standards for Product Owners, a live portfolio dashboard tied to source epics, per-product migration sessions, office hours, and escalation paths for unresolved cross-functional decisions.
- **Mapped and escalated migration dependencies** across Product, Architecture, Infrastructure, Security, Finance, cloud providers, and customer migration, separating executable engineering commitments from milestones contingent on upstream architectural, commercial, or leadership decisions.

ENTERPRISE AI ADOPTION

- **Led AI adoption and enablement for 1,500+ engineers and product leaders**, consolidating tooling (Claude Code, Codex, Cursor, Lovable) and building the governance, workflow integration, and peer-led enablement community behind it.
- **Built an automated AI tool onboarding workflow in Jira**, with governance, that brought speed and precision to provisioning, with a focus on newly hired engineers and product leaders starting with the right tools and guardrails in their first week.
- **Measured AI impact without a velocity baseline.** Designed a framework using Atlassian RoVo agents and Claude via MCP to cross-analyze Jira telemetry across Product and Engineering teams against AI tool usage. Rolled findings into executive ROI models that informed multi-million-dollar funding decisions.

ADDITIONAL PORTFOLIO PROGRAMS

- **Governing the Unified Cyber Resilience Portal from alpha toward GA.** Alpha announced at Kaseya Connect in H1 2026, followed by early access in June 2026. Coordinating Product and Engineering execution and release readiness.
- **Coordinated delivery across 7 Cyber Resilience launches in 2026**, including AI-powered backup screenshot verification, Azure Files and Blob restore, and agentless Hyper-V protection, managing dependencies, launch risk, and GTM readiness to protect committed dates.

- **Program-managed H1 strategic initiatives targeting multi-million-dollar FY26 revenue impact** across churn reduction, evergreen, and customer reactivation; partnered with Boston Consulting Group and executive leadership on Backup portfolio analysis, repositioning, and pricing.
- **Diagnosed why a strategic Azure backup growth objective was underperforming**, mapping gaps in seller awareness, CRM data quality, incentive alignment, and GTM activation across Product, Marketing, RevOps, Sales, and Compensation before the target could be credibly committed.

Associate Director, Training & Development

Aug 2024 – Aug 2025

Kaseya · Miami, FL

- Built the leadership and manager enablement system for a **5,000+ employee** global technology organization; supervised a team of 4 full-time L&D professionals across instructional design, LMS, and training operations.
- Launched Kaseya's **first enterprise goal-cascading system** and co-developed its **first leadership development program with Gallup**, with KPI dashboards tying manager effectiveness to engagement and execution outcomes.

Manager, Training & Development

Jul 2023 – Aug 2024

Kaseya · Miami, FL

- Launched Kaseya's **first global New Employee Orientation program**, operationalized the enterprise LMS, and designed the **AI literacy and policy curriculum** that preceded the engineering AI rollout.

Manager of Clinical Training and Development

Aug 2021 – Jul 2023

Banyan Health Systems · Miami, FL

- Ran the full clinical training lifecycle across multidisciplinary teams; led organization-wide implementation of WELLE Behavioral Emergency Safety Training and co-administered the LMS through a full migration to Relias.

Program Specialist

Jun 2020 – Aug 2021

New York State Office of Mental Health (Research Foundation for Mental Hygiene) · Albany, NY

- Led training and technical assistance for a statewide FEMA Crisis Counseling Program, designing launch training for **55 provider agencies** and co-authoring quarterly reports to NYS and FEMA.

Earlier: Integration Specialist (Contract), Foundation for Health Leadership & Innovation (2019 – 2020) · Owner, Shaker Mental Health Counseling, P.C. (2014 – 2022) · Manager, Psychology Department, Center for Disability Services (2011 – 2017) · Residence Director, Siena College (2008 – 2011)

HANDS-ON AI DEVELOPMENT

Builds with **Claude Code and Codex**, mostly in **TypeScript and JavaScript**: a multi-agent desktop orchestration app (Electron, React, TypeScript) running a local open-weight model via llama.cpp, a **Jira MCP server**, richardecaliendo.com (built with Codex, deployed on Netlify), an e-commerce agent, and an AI lesson-plan engine for StandardCraft, an EdTech platform for teachers.

TECHNICAL TOOLKIT

Program & Delivery: Jira, Jira Plans, Confluence, Asana, Agile/Scrum, SAFe, launch governance, dependency mapping, release management, portfolio dashboards

AI & Agents: Claude, Claude Code, Codex, Atlassian RoVo agents, MCP, GitHub Copilot, Cursor, Lovable, M365 Copilot, AI governance, prompt and workflow design

Build Stack (AI-assisted): TypeScript, JavaScript, React, Electron, llama.cpp local inference, Git and GitHub, Netlify

Program Domains: object-storage data-plane migration, public-cloud migration, Microsoft Azure (Files, Blob), backup and BCDR, FedRAMP readiness, SaaS platform consolidation

Analytics & Automation: Power BI, Excel, Power Automate, Power Apps, SharePoint, Microsoft 365, Zapier

EDUCATION & PROFESSIONAL DEVELOPMENT

M.Ed., Community Mental Health Counseling, The College of Saint Rose · GPA 3.96

B.A., Psychology, SUNY Oneonta · GPA 3.87

Anthropic Claude Code Technical Workshops, AWS × Anthropic Partner Program (ongoing) · Project Management Bootcamp, Technical Institute of America · Managing Projects with Microsoft Teams, LinkedIn Learning

Consulting & Expert Roles: Leadership Development Author, SimonSez IT · Psychology Subject Matter Expert, LearningMate
